Public Benefits Analysis

Student Loan Program

2002

Each year, the California Debt Limit Allocation Committee reserves a portion of its tax-exempt private activity bond authority for the Student Loan Program Pool. Authorized student lenders issue tax-exempt bonds either to finance direct loans to college students and their parents or to purchase bundles of already-originated loans on the secondary market. When used for direct lending programs, tax-exempt bond allocation allows lenders to pass on interest rate savings to needy students via below market interest rate loans. Needy students are borrowers for whom the cost to attend college exceeds their ability to pay, as determined by their school's financial aid office. Currently, only three agencies are authorized to issue tax-exempt bonds for student loan programs in California: ALL Student Loan Corporation, Chela Financial and the California Educational Facilities Authority.

In 2002, CDLAC awarded \$199,418,398 in allocation, representing 7.7% of the state ceiling, to two issuers (ALL Student Loan Corporation and Chela Financial), both of which operate direct lending programs in California. Overall, the allocation will help to originate approximately 51,132 loans, each of which will save borrowers hundreds of dollars over the life of the loan compared to conventional, non-discounted loans. Approximately 85%, or \$169,505,638, of the allocation will benefit needy borrowers.
